

The Fultest 2 is a 12V lead acid and lithium battery tester that offers a complete testing program such as battery test, cranking test, charging test and print. Not only does it check the voltage reading, it also checks the CCA (cold cranking amps) to check how your battery is truly operating. Thus, this tester gives a comprehensive analysis of your battery's lifespan. As well as accurate battery health indication, it is also able to test alternator and starter tests. Designed for any professionals, Fultest 2 is a good way to check easily the health of your automotive and powersport battery!
