

FULLLOAD F10

Datasheet

BATTERY CHARGER & MAINTAINER

SPECIFICATIONS

The all-new FULLLOAD F10 is our most powerful and advanced charger - an automatic battery charger and maintainer engineered for both Lead-Acid and Lithium batteries. With 5 selectable modes and a dedicated Power Supply function, the FULLLOAD F10 delivers outstanding versatility for medium to large-capacity batteries, offering 6V charging at 2A and 12V charging at 10A. Safe, efficient, and user-friendly, its three-stage charging process ensures optimal performance, protection, and extended lifespan for all your batteries.
