

# FULLLOAD F10

## Datasheet

## BATTERY CHARGER & MAINTAINER

### SPECIFICATIONS

The all-new **FULLLOAD F10** is our most powerful and advanced charger, an automatic battery charger and maintainer engineered for both Lead-Acid and Lithium batteries. With 5 selectable modes and a dedicated Power Supply function, the FULLOAD F10 delivers outstanding versatility for medium to large-capacity batteries, offering 6V charging at 2A and 12V charging at 10A. Safe, efficient, and user-friendly, its three-stage charging process ensures optimal performance, protection, and extended lifespan for all your batteries.

### FEATURES

- » Wide compatibility: for 6V/12V Lead-acid batteries and 12V LiFePO4 batteries
- » 5 charge modes: to suit different battery types and conditions
- » Power Supply function: provides a stable output to power the vehicle's electronics during maintenance or battery replacement.
- » Simple operation: connect, select charge mode and forget
- » Clear LED display: easy-to-read indicators for charge status
- » Very safe: protected against short circuits, reverse polarity, overcharging and overheating

### BOX CONTENT

- » 1x FULLOAD F10
- » 1x Clamps set
- » 1x User manual
