

FDM12-800 (M31)

Datasheet

FULBAT®
INDUSTRIAL BATTERY

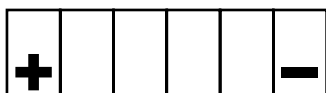

+ - CA/CA

FDM Series are Dual Purpose SMF batteries specifically developed to provide both strong engine starting power and reliable energy supply for onboard equipment in marine and leisure applications. With their maintenance-free construction, low self-discharge rate, and robust design, these batteries deliver long-lasting performance and dependable operation. The FDM range is an ideal solution for recreational boats, caravans, and motorhomes, offering the perfect balance between starting capability and cycling endurance.

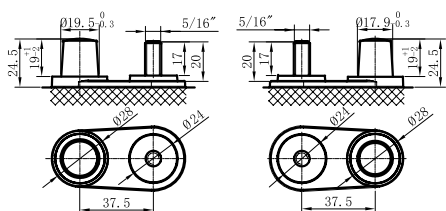

FEATURES

- » Dual Purpose Ca/Ca technology
- » Maintenance free
- » Ready and easy to use
- » Extended service life
- » Extreme vibration resistance
- » Lightweight polypropylene container
- » Convenient handle
- » Integrated venting systems
- » Handle - «Magic eye» charge indicator
